Apprentice Case Study

What led you to apprenticeship training?

I felt it would be a great way to grow my skills and improve myself and my knowledge around my role. I loved the fact I was able to work and learn alongside my apprenticeship and stay in my current role due to already being a member of staff at the school.

What have been the benefits of Apprenticeship training?

I found the apprenticeship extremely useful in terms of learning a deeper understanding on a school setting and how a school is required to meet the needs of different children.

What impact if any has training had on your knowledge, skills, professional behaviours, career progression

I feel as though I am able to talk to the teachers regarding children and their assessment for learning due to having a deeper understanding of it, I feel as though this course has given me the passion to continue wanting to learn more about my role and to continue investing time into my professional development

How would you describe the quality of the training and the support you have received from Ebor?

I was very nervous with the course being mainly online based but the support from the tutors and mentors was always there and they always had time for you. I felt as though we were really one big team learning together despite having rarely met my other team mates also doing the apprenticeship.

What advice would you give others considering an apprenticeship?

Simply be "do it". The course is an amazing opportunity to build yourself up with knowledge and become a real valued and important member of staff within your setting. Believe in yourself and invest the time into yourself and your learning and you will go far.

"My journey was a very positive one filled with lots of support and guidance from the mentors and tutors. If ever I felt doubt or worried about an assignment they were always there to support me and offer me their time."
